# Chapman KTM Tracking Motorbike

## PRODUCT SPECIFICATION SHEET

### Features:

- Only Tracking Motorbike that can carry a seated operator (inc' steadicam) on the front or on the back (facing backwards).
- Custom designed aluminium space frame for mounting cameras & remote heads front and rear
- World class motorcyclist as KTM operator
- Proven on productions all over the world
- 530cc engine with hi-torque at low revs
- 5 speed wide ratio gear box for smoother gear shifts
- On road and off road capability

To create the most exciting tracking shots, you need equipment & skilled personnel that can deliver just that. Chapman UK's customised KTM Tracking Motorbike has ensured filmmakers continue to create unforgettable moments for such recent films as: Fast & Furious 6, World War Z & Worlds End, to name but a few. The Chapman KTM Tracking Motorbike is the only tracking vehicle of its kind, designed to carry a seated camera operator, safely and securely on the front or on the back. Its size and maneuverability open up a world of possibilities for tracking shots in confined spaces and hard to reach locations.

The KTM Tracking Motorbike is supplied as a 'ready to rig' hard mount or with a **Vibration Isolator**, for front & rear stabilised camera positions. The custom designed aluminium space frame allows mounting of the **Chapman Gyro Remote Head**, giving you a camera position ranging from 8 inches, up to a height of 8 feet. The special seated configuration also accommodates a Steadicam operator.

Chapman UK chose the KTM for its on and off road versatility. A 530cc engine developing 45bhp feeds a 5 speed, wide ratio gear box, providing the KTM with higher torque than rival bikes (essential for smooth operation with additional weight). The KTM's rider is 11x British Motocross Champion & MXDN World Champion, Rob Herring.

When you combine state of the art engineering and world class motorcycling talent, you get the know-how to achieve your shot safely, reliability and on time.

At Chapman UK we're proud of our safety record and attention to detail. The KTM is a tried and tested camera platform for the most demanding tracking shots.

To see the Chapman KTM Tracking Motorbike up-close for yourself and for all your **camera support** needs call Chapman UK or visit [www.chapmanleonard.com](http://www.chapmanleonard.com)
